FortiMILK® GREEN
 Healthy Calves. Healthy Cows.™

WHY FortiMILK GREEN?

FortiMILK GREEN is a unique blend of ingredients sourced from nature, designed as a supportive measure to aid health and improve recovery during times of disease, stress, ill-thrift and gastric upsets. Non-medicated formulation ensures suitability across all species, ages, applications and farming systems. FortiMILK GREEN is designed for use in milk feeds, electrolyte feeds or as an oral drench.

THE FortiMILK BENCHMARK

- ▶ Natural formulation based on global research, development and innovation
- ▶ Tried, tested and proven across AUS
- ▶ Unsurpassed product quality, performance and support
- ▶ Endorsed by leading professionals and specialists
- ▶ Available from leading rural resellers nation wide

BENEFITS

- ▶ **Application** – convenient and flexible administration
- ▶ **Performance** – improve health and recovery during times of disease, stress, ill-thrift and gastric upset
- ▶ **Price** – exceptional value for comprehensive supportive measure

ACTIVE CONSTITUENTS

FortiMILK GREEN contains BioPAK® GREEN—a unique proprietary blend of ingredients sourced from nature including:

ANTIOXIDANT

Supplemental antioxidants help overcome stresses to which newborns may be subjected, including inadequate housing environment, extended transportation, and changing environmental conditions. Shown to assist in preventing neo-natal scours as well as speeding up recovery from neo-natal scour events.

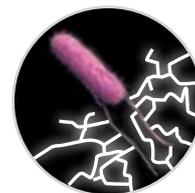

YEAST

Live yeast stimulates activity of beneficial bacteria (probiotics) in the gut of pre-weaned animals, has a supportive role in immune function and aids digestion. Contains a specific strain of yeast that has a role in preventing gastric upsets in young animals.

PREBIOTIC

Derived from yeast cell walls, the functional oligosaccharide prebiotic MOS, binds to intestinal pathogenic bacteria and prevents their colonization in, and attachment to, the gastrointestinal tract. β -glucans have a role in supporting the immune function in pre-weaned animals.

PROBIOTIC

A unique blend of microencapsulated, live (viable), naturally occurring microorganisms. An ideal inhabitant of the digestive tract due to its ability to survive harsh conditions and to thrive once they reach the small intestine. Produces large quantities of digestive enzymes to aid digestion of feed when nutrients arrive in the small intestine.

DIRECTIONS FOR USE

Designed for use in milk feeds, electrolyte feeds or as an oral drench. **TIP: Add FortiMILK GREEN to all electrolyte feeds.**

SPECIES	INDIVIDUAL DOSE (per head per day)	
	Maintenance	Stress
CATTLE CALVES	20g 10g	50g 20-50g
HORSES FOALS	20g 10g	50g 20-50g
SHEEP / GOATS / ALPACAS / DEER LAMBS / KIDS / CRIAS / FAWNS	10g 5g	20g 10g
PIGS PIGLETS	10g 5g	20g 10g
DOGS CATS PUPS / KITTENS	10g 5g 5g	20g 10g 10g
MARSUPIALS	5-10g	10-20g

PROVICO CALF MILK ADDITIVE PROGRAM

Day 1	Add 5mL/head of BioStart CALF to first colostrum feeds to ensure colostrum curd, improve colostrum digestion and release antibodies for passive immunity transfer
Day 2 - Weaning	Add either FortiMILK GOLD, SILVER or SOLUPLEX to whole milk or calf milk replacer to improve Cocci control and growth rates with Bovatec® and cover vitamin and mineral requirements. Alternatively, for a non-medicated program, feed FortiMILK GREEN from Day 2 - Weaning.

NOTE: As a supportive measure during times of disease, stress, ill-thrift and gastric upset add **FortiMILK GREEN** to all electrolyte feeds and/or can be added to milk feeds for the first 2-3 weeks of life.

PACKS 600g Jar and 9kg Pail

WITHHOLDING PERIODS NIL

RESTRAINTS & CONTRAINDICATIONS NIL

DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL
